

Gender Concepts IN DEVELOPMENT Planning

BASIC APPROACH

Based on how development planners and policy makers commonly understand and misunderstand the concept of gender, "Gender Concepts in Development Planning: Basic Approach" explains the evolution of the concept and how it has been addressed by development strategies. The booklet is intended to help development planners and policy makers understand the concept of gender and introduce a gender perspective in their work. It emphasizes the social construction of gender, the gender division of productive and reproductive work and the limitations it places on women's autonomy, economic activities and access to political power. The booklet aims at closing the gap between gender concepts, as discussed by experts, and at applying these concerns in policies, programmes and day-to-day work.

CONTENTS

- I. Introduction
 - II. Understanding Gender: Words and Meaning
 - What Is Gender?
 - Is Working with Gender Issues the Same as Working with Women's Issues?
 - Evolving Development Strategies
 - Women-Only vs. Integrated Approaches
 - From "Women in development" to "Gender and development"
 - III. Women Are Born: Gender Is Made
 - Gender Division of Labour
 - The Reproductive Dimension
 - Gender Division of Power
 - IV. Special Issues and Important Distinctions
 - Gendered and Female
 - Violence Against Women
 - Women's Human Rights
 - Women's Health
 - Family Planning and Population Policy
 - Related But Not the Same
 - Equity and Equality
 - Women's Condition and Women's Position
 - Practical Needs and Strategic Interests
 - V. Development Through the Gender Lens
 - Lessons Learned
 - Moving Forward
 - VI. Closing Thoughts
 - VII. Bibliography
