# LEADING IN TIMES OF GLOBAL TRANSITION

## A retreat for women senior leaders

Being an effective leader today requires wisdom and courage – especially with the talents women have and the challenges we face.

In this exclusive, three-day intensive retreat, you will discover your own unique leadership style and how to harness it in order to meet the demands of leading in this phase of international transition.

We will provide you with key principles for practical, modern governance solutions. Rather than a fixed theory or technique, you will come away with a deeper understanding of your intelligence and intuition, as well as how to apply these with creativity and confidence and strengthen your network and sense of connection.

The result is a heightened personal leadership acumen reflecting your own character and experience – and forms an absolutely essential experience for women in senior leadership.
